1. Which generations of computers are currently running?
   (a) 4th
   (b) 5th
   (c) 6th
   (d) 7th
2. Which one below is not a computer?
   (a) PDA
   (b) Laptop
   (c) Smart Phone
   (d) Digital Watch
3. Which one below is not a basic computer operation?
   (a) Inputting
   (b) Processing
   (c) Printing
   (d) Controlling
4. Identify the auxiliary memory of computer from below-
   (a) RAM
   (b) CD Disk
   (c) ROM
   (d) Cache
5. Which one is the brain of computer?
   (a) CPU
   (b) ALU
   (c) CU
   (d) COM
6. 1 MB= __ Bit?
   (a) 8000011
   (b) 8500000
   (c) 8564720
   (d) 8388608
7. Which one below is less costly?
   (a) Pre-written software
   (b) Customized Software
   (c) Developed Software
   (d) None of them
8. Decoration light is one of the example of below-
   (a) Middleware
   (b) Firmware
   (c) Both of them
   (d) None of them
9. What contents are typically being hold by Memory Buffer Registers (MBR)?
   (a) Read

(b) Written

(c) Both of them

(d) None of them

10. Which one below is not a basic types of ROM?

(a) PROM

(b) EPROM

(c) EEEPROM

(d) UVEPROM
